INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

The above-identified Patent Application was filed on December 13, 2001. No first Action on the merits has yet been received from the U.S. Patent and Trademark Office. No fee is believed necessary for the consideration of this Information Disclosure Statement. Should any fees in connection with the above-identified patent application be deemed necessary, authorization is hereby given to charge our Deposit Account No. 23-0920.

The publications listed below were located during a prior patent search of the subject application or were cited as references in the assignee's U.S. or foreign patents and patent applications. The patents and publications listed below generally relate to subject matter of the invention, but do not fairly teach or suggest the claimed pharmaceutical compositions with wound healing or anti-complementary activity comprising a dextran derivative. Copies of the listed publications were brought to our attention by the applicants and are enclosed for consideration by the Examiner.

1. Publication: *"New Investigations on Heparin-Like Derivatized Dextrans: CMDDBS, Synergistic Role of Benzylamide and Sulfate Substituents in Anticoagulant Activity,"* by O. Maiga-Revel, F. Chaubet and J. Jozefonvicz, of Laboratoire de Recherches sur les Macromolécules, CNRS URA 502 Institut Galilée, Université Paris Nord, Av. J.
